Mountain Weather Forecast

Lake District National Park

Forecast valid from 06:00 on Tuesday 05 Oct 2021 until 23:59 on Wednesday 06 Oct 2021

Forecast Issued on Tuesday 05 Oct 2021 at 02:58

Confidence: Lower confidence in details for Tuesday's rainfall and how long it will last, high confidence for a settled day on Wednesday but again confidence decreases towards the end of the week as another wet and windy period is likely.

Headline for Tuesday 05 Oct 2021: A wet and windy day with Northerly gales on the Fells.

Mountain weather hazards on Tuesday 05 Oct 2021

06:00	09:00	12:00	15:00	18:00	21:00
Heavy Rain	Heavy Rain	Heavy Rain	Heavy Rain	Cloudy	Partly cloudy (night)
Precipitation probability					
80%	80%	60%	40%	20%	10%

Forecast for Tuesday 05 Oct 2021

Weather: Rain becoming heavy and persistent through the day with some localised flooding possible of watercourses and access roads. Perhaps some more breaks in the rain in the west. Rain eventually clearing from the west with some cloud breaks likely during the evening.

Chance of cloud free mountain/hill tops above 800m: In the east 20% or less, in the west 30-40%, there may be more cloud breaks as rain eases at times in the western Lake District but there is uncertainty in the extent rain will spread west and how soon it will clear east in the afternoon. Perhaps some cloud breaks in the afternoon around western hills.

Visibility: Visibility will be poor or very poor around eastern Fells with extensive low cloud and heavy outbreaks of rain. Cloud is likely to be broken or extensive from 400m and above. In the west, cloud will be scattered or broken from 500m and above and rain is expected to be more showery with some clearer spells. Some brighter conditions will reach the west during the evening with cloud expected to break and clear.

Freezing Level*	1700m	1700m	1600m	1600m	1500m	1400m	1300m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling very chilly on the fell tops with Northerly gales and heavy rain at times.

Forecast for Wednesday 06 Oct 2021

Weather: Cloud clearing overnight and feeling chilly by dawn as strong northwesterly winds begin to east. Perhaps some localised frost possible. A bright day is expected with lots of Autumn sunshine, perhaps clouding over later in the afternoon.

Maximum wind: Northwesterly 20mph with gusts 30mph around dawn but steadily easing and 10-15mph is likely by mid afternoon, turning southerly later in the evening.

Chance of cloud free mountain/hill tops above 800m: 90%, some early patches of cloud but nearly all summits will be clear with good clarity of air in the northwesterly airstream giving good views during the afternoon.

Visibility: Very good visibility but some patches of cloud around 700m at the start of the day.

Temperature: **Valleys:** Plus 5 rising to 12 Celsius.
At 800m: Plus 2 Celsius rising 8 Celsius.
Freezing level: Above the summits.
